

How to make video lecture?

You can make video lecture by using video camera, smartphone, etc. We recommend you to use [Screencast-O-Matic](#): You can recording computer screen, web camera and audio at the same time. You can share video easily (have a look at *How to share video lecture*). You can download Screencast-O-Matic for free. Limitation of video is 15 minutes! If your recording is longer divided it and share it in two parts. [Example](#) of video lecture made by Screencast-O-Matic.

Requirements of video lecture

1. Good quality of video and audio
2. Visualization of presentation
3. Keynote lecture (have a look at instruction of Keynote lecture)
4. Lecturer presentation shortly in the beginning
5. Save MP4 format (recommendation)
6. Max 15 minutes (recommendation)
